Nintex® Forms

SharePoint Forms for Everyone on Any Device

Nintex Forms is a web-based designer that enables forms to be created within SharePoint quickly and easily. Forms can then be consumed on most common mobile devices from the internet, anywhere and anytime. Nintex Forms integrates seamlessly with Nintex Workflow to automate business processes and deliver rich SharePoint applications.

QUICK & EASY FORMS DESIGN

Empower business users and enhance developer productivity:

- Auto-generate forms to support your business applications
- Customize forms quickly with an intuitive browser based designer
- Design once and publish to browsers and mobile apps in an instant

ACCESS ANYWHERE, ANYTIME

Provide secure access to SharePoint forms and processes anywhere on any device:

- Take your processes on the go
- Make the best use of mobile devices to capture data
- Extend access to external users without reconfiguring your firewall

SEAMLESS WORKFLOW INTEGRATION

Extend the value of your investment in Nintex Workflow:

- Transform workflows into business applications with rich user experience
- Interact with key business processes whether online or offline
- Leverage a wide range of cloud services through Nintex Live*

* Requires Nintex Live and Nintex Workflow

Start your free trial by visiting **nintex.com/forms**

QUICK & EASY FORMS DESIGN

Nintex Forms is intuitive, browser-based and requires no client software licensing or installation. Design visually appealing forms with sophisticated business logic and rich HTML formatting.

Customize predefined layouts for any device, form factor or screen size. Preview forms before publishing to ensure delivery of optimal user experience.

ACCESS ANYWHERE, ANYTIME

Nintex Forms provides one-click publishing to Nintex Live, securely extending forms and processes to users outside the firewall. Native mobile applications support offline access and enable capture of touch input, location data, camera photos, video, audio and more.

SEAMLESS WORKFLOW INTEGRATION

Nintex Forms automatically generates workflow forms that can be quickly customized, turning traditional workflows in to sophisticated business applications.
